U.S. Patent and Trademark Office PTOL-303 (Rev. 7-05) Continuation of 3. NOTE: The recitation of an incubator workspace raises new issues to the scope of an incubator structure, which would require further consideration and/or search, see below with regards to arguments to claim 14.

Continuation of 13. Other: With regards to claim 14, the arguments are unpersuasive, the it is noted that once plural shakers are provided one above another into the Malterer et al structure, one may point out a specimen storage unit above a clamping element 60 from another shaker which is disposed horizontally above it. The claims provide a laundry list of elements in relative position, however does not provide any positive connective structure between the elements to exclude such an interpretation, between the different shakers. It is also noted that spacer 62, 64 is above the shaking platform 30, 70; clamping element 61, 63 is above the spacer 62, 64.
